

EBICS connection parameters

Datalink

Connection parameters EBICS

URL	https://ebicsweb.zkb.ch/ebicsweb
Hostname	ZKBKCHZZ
Port	443
EBICS version	2.5 (scheme version: H004) 3.0 (scheme version: H005)
Accepted Keys	Authentication/Encryption: X002/E002
Electronic signature	Signature: A005 und A006
Customer ID/User ID	Corresponds to the Datalink agreement number

By using corporate seal, the user ID and the customer ID are identical and correspond to the datalink agreement number. Exactly one user ID is assigned to a Datalink agreement, which is given the signature class individual signature (E). We recommend the release of payment orders over eBanking.

Public EBICS bank keys or certificates of Zürcher Kantonalbank

Technical specifications of the order types "Download"

Order type

Comments

STA	– Are provided concatenated in one file – For a new Datalink contract, the account statement number will be generated with the currently valid daily statement number
VMK	Are provided in a file every 15 minutes during the day (only delta delivery)
ZS2, ZS3, ZS4, Z01, Z52, Z53, Z54, ZQR, ZRF, ZDF	Delivery in ZIP container (all camt messages as well as PDF files)
HAC, PTK	Are provided concatenated in one file
ZB6	Are provided concatenated in one file (per day and ISR Id one totalrecord)
generell	In the file name the order type is specified on the first three digits

The currently valid order types are published on zkb.ch/datalink.
