Further expansion stages possible (e.g. trading interface)

Requirements
– You have access to the eBanking section of Zürcher Kantonalbank.
– You have the necessary powers of attorney.
– You use a software solution that is connected to the SIX bLink platform.

OpenWealth Association
As a founding member, Zürcher Kantonalbank works together with its members to pursue the vision of defining, maintaining and developing an Open API Standard for a global asset management community. In addition to various banks, various portfolio management systems and service providers are also connected.

Information about the SIX bLink platform
With bLink, SIX provides financial institutions and software providers with a platform for standardised interfaces. Participants connected to the platform can link to each other easily and securely. With an interface connection, you obtain your data from all participating banks.

Price
It is free of charge.
